Marcus Medina
Campus Mölndal, Teacher
Email: marmed02@gafe.molndal.se

PROFILE

Recently graduated Cloud Developer (.NET) from Campus Mölndal. Hands-on experience with C#, .NET, Azure and AWS through practical projects — REST APIs, serverless solutions and cloud infrastructure with Bicep. Looking for a trainee program or junior role to grow and contribute within a team.

PROJECTS

ServerlessImageProcessor
github.com/amir-qurbani · C# · Azure Functions · Blob Storage
Serverless image processing — an Azure Function is triggered automatically, resizes the image, and saves it to Blob Storage.

WarehouseAPI
github.com/amir-qurbani · .NET 9 · EF Core · SQL Server · Docker
REST API for warehouse management with EF Core migrations and SQL Server running in Docker.

JobMatch
github.com/amir-qurbani · C# · ASP.NET Core
REST API for job matching built in C# — actively under development.

Local AI Assistant (Thesis project)
github.com/amir-qurbani · Python · SQLite
Scans folders, extracts text from PDF/TXT/MD files, and matches search queries with AI support.

EDUCATION

Cloud Developer .NET — Campus Mölndal Yrkeshögskolan
Fall 2024 – May 2026
C#, .NET, Azure, AWS, Docker, GitHub Actions, CI/CD, REST API, Bicep IaC, TDD
